PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 8+ years building Python, Node.js, C#/.NET, Golang, and React applications, from database schema to UI to CI/CD pipeline. Built data pipelines and ML-powered features that increased client revenue up to 3x, lifted conversions 211-400%, and cut manual review time 77%. Azure Data Scientist Associate with Deep Learning Specialization training and cloud-native experience on AWS and Azure.

PROFESSIONAL EXPERIENCE

Senior AI Full Stack Engineer May 2022 - June 2026

Convoso | *Los Angeles, CA*

- Developed Convoso's AI/ML dialing and automation platform with Python, React, and AWS serverless and containerized services, driving 400% conversion growth and 4-8X call center ROI for client C-Squared.
- Built data pipelines processing millions of daily call events and integrated Automatic Message Detection (AMD) and caller ID models, tripling revenue and cutting spam-labeled DIDs 60% for client Medigap Life.
- Introduced Jest and React Testing Library coverage across React and .NET services, increasing feature delivery speed ~20% for nationwide sales teams.

Senior Full Stack DevOps Engineer October 2020 - May 2022

GRSP Tech | *Atlanta, GA*

- Architected React, C#, and .NET applications on AWS with Docker and zero-downtime CI/CD, including an ML-enhanced search engine serving 20,000+ users on Bokadirect's e-commerce platform.
- Designed Golang and Node.js microservices delivering real-time data processing, autocomplete, fuzzy search, and Elasticsearch filtering that improved search relevance.
- Integrated Strapi headless CMS, MySQL, and SQL Server with React frontends to launch a real-time, shareable personality test platform for Tocca Entertainment.

Software Engineer, Data Engineering October 2018 - August 2020

Reveleer | *Glendale, CA*

- Designed production data pipelines in Python, PySpark, and Spring Boot that transformed raw clinical event logs into structured layers for AI/ML applications.
- Trained NLP models (EVE AI) with anomaly detection to abstract unstructured medical charts, reducing manual review time 77% and improving care gap detection accuracy 20%.
- Automated hourly ingestion and validation jobs powering the Care Gap Manager dashboards, producing a 14% PMPY revenue increase and 11% RAF score lift for multi-state health plans.

Web Developer September 2017 - June 2018

Flying V Group | *Newport Beach, CA*

- Created responsive React and Node.js landing pages that drove a 211% increase in user conversions for client Pareto Labs.
- Wrote Python web scraping scripts to aggregate campaign metrics, helping the marketing team reduce client cost-per-acquisition (CPA) 83%.

Undergraduate Research Assistant June 2016 - May 2017

University of California, Santa Cruz | *Santa Cruz, CA*

- Modeled brown dwarf and hot Jupiter atmospheres in Python and FORTRAN, producing a public 7D grid of thousands of models.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C#, Golang, SQL, FORTRAN
Frameworks: React, Node.js, .NET, Spring Boot, PyTorch, PySpark
AI/ML & Data: Machine Learning, Deep Learning, NLP, Data Pipelines, ETL/ELT, Elasticsearch
Cloud & DevOps: AWS (Elastic Beanstalk, Serverless), Azure, Docker, CI/CD
Databases: PostgreSQL, MySQL, SQL Server, Strapi CMS
Practices: Jest, React Testing Library, Git, Agile

EDUCATION

B.S. in Astrophysics, University of California, Santa Cruz 2012 - 2017

CERTIFICATIONS

Microsoft Azure: Data Scientist Associate, AI Fundamentals, Data Fundamentals, Azure Fundamentals (May 2022)
Coursework: Deep Learning Specialization (DeepLearning.AI), Applied Machine Learning (U. Michigan), SQL for Data Science (UC Davis)
